**A**NCESTRY, after all, has much to do with clothes as well as with humans. And scarce a line of clothing in America can boast the inheritance of "Morse-Made" Clothes.

For over 60 years now, generation after generation of conspicuously high grade garments have carried the name of the House of Morse with honor.

Probably no group of garments from the famous great Morse shops in Boston has ever reflected greater credit upon their makers than "Morse-Made" Suits for men and young men for Spring, 1916.

Viewed from any angle you wish, these extraordinary garments are worth your closest attention. Examine them stitch for stitch and we think you will agree with us that at

## WILL MODIFY BURNETT BILL

In Order Not to Offend the Japanese Government

DRAFT PREPARED FOR ADOPTION

Senate Immigration Committee Eliminates "Gentlemen's Agreement"

Washington, D. C., April 28.—The Senate immigration committee yesterday agreed to modify the Asiatic exclusion section of the pending immigration bill to eliminate reference to the Root-Takahira agreement restricting immigration of Japanese laborers. The conference was attended also by Chairman Stone of the foreign relations committee. The Japanese government resents the proposal to enact agreement into law and also objects to a provision by which inference would class Japanese with excluded Hindus.

A tentative draft of an amendment was considered and probably will be submitted to the state department for conference with the Japanese ambassador. "There will be no trouble about it," said Senator Lodge, "and a satisfactory amendment will be submitted at the proper time."

GULICK DEFENDS JAPAN.

Is Only Asking That It Be Not Humiliated By Our Immigration Laws.

Garden City, N. Y., April 28.—Japan is ready to do whatever may be needful, consistent with her national honor and dignity, to save America embarrassment in framing our immigration laws to prevent economic and racial disturbances, according to Rev. Sidney L. Gulick, for 26 years a missionary in Japan and professor in universities in that country. Addressing the Federal Council on Peace and Arbitration of the Churches of Christ in America here Wednesday night, Rev. Mr. Gulick declared there is a wide misunderstanding in America as to what Japan asks.

"What Japan asks earnestly," said Rev. Mr. Gulick, "is that there shall be no invidious and humiliating race legislation which shall involve her fair name. For this she has been strenuously striving for half a century. Is the maintenance of friendship possible between two nations when one insists upon humiliating the other?"

"America," he added, "should admit as immigrants only so many aliens from any land as she can Americanize. Let, therefore, an immigration law be passed which provides that the maximum permissible annual male immigration from any people shall be a definite per cent (say five) of the sum of the American-born children of that people, plus the naturalized citizens of the same people."

A plan to raise \$200,000 with a purpose to organize a movement to hold a world conference of churches after the close of the European war was announced at the conference by Rev. Frederick Lynch of New York City. A delegation from the alliance left yesterday for Washington hoping to obtain President Wilson's approval of the project. It was stated that the money desired is virtually available and it was reported that Andrew Carnegie might subscribe a major portion of the fund.

WASTEFUL, SAYS LODGE.

Senator Voices Opposition to the Bankhead Food Roads Bill.

Washington, D. C., April 28.—"The primary purpose of this bill," declared Senator Lodge to the Senate yesterday afternoon, "is the distribution of a large sum of money among deserting states and deserving people. The sum of \$73,000,000 is an enormous sum of money to take out of the treasury of the United States treasury at this time, but spent on the roads of the United States as a whole, it is a thing."

The senator analyzed at some length

the Bankhead bill, emphasizing particularly the wastefulness of the proposition. This, he said, "is a plan to get the people of the United States to dump in money annually to the local improvement of some roads. It is exactly like having the United States come to some town to help to remove the snow or clean the mud."

Seventy-five million, said the senator, would not assist in building up a national road system.
